

Tire Measurement Form

Measuring the tire is easy to do, but it is important to follow the exact steps below, so it is ACCURATE (if it is not accurate it is worthless).

Your Name

Your Email

Tire Brand

Tire Model

Tire Size

Rim Width

Tire Circumference Measurement

Tire Bead Width Measurement

Tire Inside Circumference

Highlighted in red is what needs to be measured.

Secure one end of the measuring tape to the edge of the inside of the tire.

Make sure the tape is in contact with the tire all the way around the inside and take the measurement at the opposite edge of the inside of the tire.

Bead Width

Highlighted in red is what we need to measure.

Hook the tape measure to the inside edge of the tire bead and measure the width of the bead, a caliper works as well.
